

## NUCLEAR RESOLUTION

WHEREAS, the International Joint Commission has declared that radioactive materials be included in the definitions of persistent toxic substances, and has established a Nuclear Task Force; and,

WHEREAS, the Great Lakes Basin hosts every aspect of the nuclear fuel chain; and

WHEREAS, the viability of the Great Lakes Basin ecosystem is threatened by routine radioactive and non-radioactive pollution from these facilities and waste sites, as well as the risk of a catastrophic reactor accident; and

WHEREAS, energy efficiency and renewable energy options exist which can replace both nuclear and fossil generating stations;

THEREFORE, be it resolved that Great Lakes United establish a Working Group or Task Force on nuclear issues to address these issues, liaise with other Task Forces, and increase Great Lakes United's profile in the nuclear debate.
